

Cycle 2 — UTR context, same-strand only, optional variants, readable summary

Region gate

Drop only if hit overlaps 5'/3'UTR
and length $\geq N$ nt

Same-strand only

$sstart < send \rightarrow$ consider

$sstart > send \rightarrow$ ignore

Reverse hit is the BD sequence elsewhere,
not a bindable sense site

Optional --variants

candidate genomic window

Off by default
`common_all overlap` $\rightarrow$ drop

Readable blast_matches summary (Learn)

site	matched_gene	region	aligned_nt	drops_site
tile-A	GENE_X	3'UTR	21	yes
tile-A	GENE_Y	— (CDS)	28	no
tile-B	GENE_Z	5'UTR	14	no
